Group 18: 312 Project — Personal Report

Lucian Chauvin

1   My Contributions

Throughout this project I created the decode module along with putting together the memory module. I also completed a lot of debugging and did a good bit of writing the final lab report. I also changed our compiler to work with big endian. This was fun.

1. My name is Lucian Chauvin and my group members were Joshua Lass and Bjorn Quarfordt.

2. Both my group members worked very hard and well. I was pleased with them and what they did. I think our only problem was that we procrastinated too much.
